

List of indicators not included in the assessment

Indicator	Reason for exclusion
3.1.1 Maternal mortality ratio	Target set at the global level; progress not assessed at the regional level
3.2.1 Under-five mortality rate	Country-level reporting incomplete for the current reporting cycle
3.3.1 New HIV infections per 1000	Insufficient disaggregated data to assess regional progress reliably
3.4.1 Cardiovascular disease mortality	Baseline not established for the assessment period under review
3.5.2 Alcohol per capita consumption	Methodology under revision; values withheld pending validation
